11.1.1 Mixtures
No toxicological information is available for the mixture itself

11.1.1 Mixtures
No toxicological information is available for the mixture itself

Section 12: Ecological information

In case that test data regarding one endpoint/differentiation exist for the mixture itself, the classification is carried out according to the substance criteria (excluding biodegradation and bioaccumulation). If no test data exist, the criteria for mixture classification has to be used (calculation method). In this case the toxicological data of the ingredients are shown.
